We manage the cloud.

CLOUD HOSTING

MANAGED SERVICES

ZIMBRA EMAIL

Cloudhosting

Total flexibility and affordability - We offer a variety of cloud types and cloud products because we understand that every business is different, and has different needs. In Addition to our cloud products, we are now partnered and integrated with AWS so you can mix both our cloud products into one seamless environment providing the best product for your specific needs.

Public Cloud	**Private Cloud**	**Hybrid Cloud**	**Enterprise Cloud**	**Amazon Web Services**
Achieve high performance computing, storage, and security with flexibility, transparency, and affordability.	Have your own secure scalable cloud of any hypervisor. Best pricing is achieved with a term agreement.	Create the perfect cloud. Plus, we have true inter-connect for top performance networking.	When you hit critical mass, all the rules change and so do we, by changing our pricing and support model.	Buy any AWS service from us and get FREE support. Plus, add any Mindcentric manage service or cloud later if needed.

Managed Services

Focus on your core business and we will do the rest - Since 1999 our core business has been managed services. With our u nique teaming support model we create a 1-on-1 relationship with our customers that integrates us with your team(s). Plus, we scope our services to provide you with a much or as little, as you need. You can focus your time and resource where they are utilized best.

Managed Cloud

We'll focus on IT and provide custom computing and custom support services. You focus on your business.

Scope of Services

A specific scope of services is created for each costumer, including itemized roles and SLAs.

Why we're better

Our core business is managed services, "managing the cloud hosting". We provide managed support services tailored to your needs. We also provide raw cloud computing, storage, and networking infrastructure with or without managed services.

DEDICATED SUPPORT TEAMS

Our objective is to augment your company with our services. We become a tightly integrated extension of your resources so we can provide valuable technical information and recommendations based on your business needs, not just your technology needs. We accomplish this with our Team Support Model, which is a dedicated team of individuals who are specifically assigned to each individual customer. This level of support is in addition to our 24/7 support center.

THE ULTIMATE HYBRID CLOUD
Public Cloud + Private Cloud + Dedicated Computing + Managed Colo = Ultimate Hybrid Cloud

There are good business and technical reasons to use all the services listed above to give your company the best overall competitive edge. MindCentric can provide some or all of these services in a seamless, integrated high-performance computing environment. We will manage all aspects of a hybrid environment, configuring and allocating the blend of services so you have guaranteed quality of service.

TOTAL VISIBILITY

Where other managed service providers stop, we are just getting started. We monitor and log everything, even the things we don't support. By monitoring everything in the environment, we have a holistic in-depth knowledgebase of facts. Then, jointly we can use this data to make smart fact-based decisions to accomplish any task. This is done with our "War Chest", a proprietary application and system performance monitoring and tracking system. Each customer gets a private War Chest, so the data is private and customized to your specific needs.
